

# Price list Participation in PC-Horse for feed producers

Based on a collaboration agreement between feed manufacturers and PC-Horse, feed brands and individual feeds are included in the PC-Horse feed lists. Feed companies get access to the consultant version of PC-Horse for internal use, and licenses for their nutritionists and other employees at an annual fee.

The agreement regulates how PC-Horse makes your feeds available to European users. Distribution is based on the Brands, Feeds, and Countries selected by the feed company. A closed distribution to the company itself, to preferred customers and to educational institutions is also available.

For international feed manufacturers the PC-Horse concept offers an unique opportunity to deliver feed data accurately and without delay to end users. All feed data are kept encrypted and can not be changed by users of PC-Horse.

## What is shown in the different PC-Horse versions:

Program versions	MINI	STD	PRO	CONS	EDU
